

**REMARKS**

The third supplemental sequence listing submitted herewith supercedes all previously submitted sequence listings. The sequence listing is provided in paper and computer readable form pursuant to 37 C.F.R. §§ 1.821-1.825. The CRF copy of the sequence listing is provided in ASCII text, in a document labeled "09-441,966 Sequence Listing," on the enclosed diskette. In accordance with 37 C.F.R. § 1.821(f), the sequence listing information recorded in computer readable form is identical to the written (paper copy) sequence listing enclosed herewith. Moreover, the submission of the sequence listing adds no new matter to the application.

The new sequence listing corrects errors in two of the sequences appearing in the former sequence listing, SEQ ID NO:9 and 35. SEQ ID NO:9 is supported by Fig. 3. SEQ ID NO:35 is supported by page 19, line 22. In addition, minor changes were made to the sequence information for SEQ ID NO:9, 10, 35, 46, 48, 75, and 76.

Furthermore, the new sequence listing includes one additional sequence, SEQ ID NO:106, which lists the four-amino acid sequence shown on page 75, line 4 of the specification. SEQ ID NO:106 was added in response to an objection to the specification made in the Office Action mailed July 2, 2002.

The new sequence listing is fully supported by the application as filed; no new matter has been added. Furthermore, the new sequence listing is fully compliant with WIPO Standard ST.25 (1998).

Respectfully submitted,

Dated: September 9, 2002
